NEW STRIKE IN THE CON. MERCUR

Fine Body of Oxide Ore Cut in New Ground on 200 Level.

WITHIN 200 FEET OF INGOT

RICH ROCK OPENED IN SEVERAL PLACES LATELY.

(Special to The Herald.) Mercur, Oct. 15,-In a drift on the 200foot level of the Consolidated Mercur company's mines a fine body of exide ore was broken into Friday night. The ore is of a considerably higher grade than those from which the company has been able to earn good dividends

This strike, which has been made it new ground, furnishes additional evidence that the mine is good for many years to come and that dividends will continue to reach the pockets of the shareholders with regularity. The drift in which the strike was made is being run in the direction of the terri-

several places in the Consolidated Mer-cur ground during the last few menths, but this last strike is looked upon as being of particular importance, as it appears to prove up the territory in a new direction

LONE MOUNTAIN DISTRICT.

Camp Adjacent to Tonopah Has a Great Future Before It.

Every month the problem of the economical and profitable treatment of the enormous bodies of low grade ore of the Tonopah mines becomes more difficult of solution, and it is now generally admitted that eventually the smelting of these ores will be inevitable, says J. W. Stoneham in the Min-

ing World.
For this reason the importance of the development of large bodies of fluxing ore in the district cannot be over-estinated and Lone mountain seems to be the only adjacent district that promises to produce these fluxes.

The Lone Mountain mining district

commences at a point fourteen miles west of Tonopah and extends for a distance of twenty miles north and south, by about eight miles east and west. At the north end stands Lone mountain, a massive isolated granite peak, which on its west side forms a contact with a lime belt and on the eastern side lime and shales also contact with the gran-ite. On the north and south are a series of low hills through which are slates, schists and altered limestones split by igneous dikes, such as epidote and porphyry, forming an ideal geoogical condition for mineralization. The sures and cross-fissures, nearly all of which show the presence of mineral and in many the outcropping ore bodies are of high grade. In the granite or on its contact with volcanic rocks some gold veins were evidently found in earlier days as the ruins of an old arcastra testify. The first record of the mining of other ores, however, dates to 1871, when the General Thomas mine was discovered, and some high grade "sand carbonates" were mined. About seven years later high grade ore carrying silver chlorides and copper carbonates were shipped from the Cabin mine in the extreme south of the west-

Nevada-Alpine's Wealth.

The district may be said to have bee rediscovered in 1902 by prospectors from Tonopah, who located what is now known as the Nevada-Alpine mine on the northwest end of the mountain. The surface showing here was very flattering, a strong body of lead carbonate ore outcropping in a lime fis-sure, the values being 40 per cent lead property was purchased in November property was purchased in November, 1902, by T. J. Lynch of Tonopah, for the Lynch-O'Meara syndicate of Salt Lake City, and as a private corporation entitled the Nevada-Alpine Mining company, by November, 1902. had shipped out over \$209,000 worth of ore and distributed a dividend of \$80.000, the first to be paid in the Tonopah distributed. The mine has been a regular of \$100.000. district. The mine has been a regular producer ever since, and is now shipping about seventy-five tons of ore monthly, realizing over \$200 a ton, with only five men working, and at a depth of 370 feet ore to the value of \$400,000 is exposed in the workings. Such a "grass root" mine naturally led to a large portion of the entire district being located, and several companies were organized and some superficial prospecting was done on high-grade

Among these companies were the Esperanza, which shipped a few tons of shipped some high-grade silver-lead ore, and the Utopia shipped silver-chloride ore. The General Thomas mine, however, owned by the Tonopah Belcher Mining company, was explored to a depth of 100 feet on the dip of the ore oody and shipped several carloads of lead-carbonate ore, having high values in silver and realizing from \$42.50 to silver and realizing from \$42.50 to \$129 a ton. It pay, therefore, be truly said that no exploration work had then been done at depth. At this time Goldfield began to come into prominence and the counter attraction of gold at this camp, and subsequently at Bulltron, proving irresistible. Lone manner. frog, proving irresistible, Lone mountain was deserted except by the operators of the Nevada-Alpine mine,

Merits of District.

Since then a series of events have oc-curred which have forced the merits and future possibilities of the district upon the attention of operators and investors, and these may be briefly summarized as follows:

companies.

2. The fact that the low-grade ores

which predominate in the Tonopah mines must be smelted locally to yield a commercial profit. The increase in the price of cop-The fact that the Lone Mountain

district comprises a countless series of outcropping ore bodies carrying values from \$20 to \$60 per ton, and that it is served by both the Tonopah and Goldfield railroads at no point further than seven miles distant. While the West-

nies, 110 feet deep, six feet of lead-silver ore, averaging \$10 a ton. Other

veins undeveloped.

Argenta Mining cómpany, seventysix feet deep, from ten inches to three
feet of galena, 72 per cent lead, \$13 sil-

columbia Gold Silver Mining company, eighty feet deep, four-foot vein, pay streak from ten inches to three feet in width, averaging from \$250 to \$400 a ton in gold and silver.

Princess Maud Mining company, 200 feet deep, vein from ten inches to four feet wide, galena ore with gold and silver, making total average values \$80

All of the above companies will emmence shipments this month.

Fine Prospect.

The following companies are developing promising ore bodies of payable value: The Basel Mining company, value: The Basel Mining company, vein seven feet wide, copper-gold and silver; Enterprise Mining company, eighty-six feet deep, copper vein four to eight feet wide, from \$12 to \$60 a ton; McMullen group, thirty feet deep, copper vein three to eight feet wide, from \$26 to \$58 a ton; Paymaster Mining company, 200 feet deep, width of vein and values not known. Other properties are preparing to start work. properties are preparing to start work, among which are the Tonopah Belcher Mining company and Tonopah Monarch Mining company adjoining, having several shafts sunk from forty to 100 feet deep on different veins showing values from \$25 to \$60 a ton.

from \$25 to \$60 a ton.

It is satisfactory to know that these operators have been greatly encouraged by the favorable opinion publicly expressed of Professor Arthur Lakes of Denver, Colo., who was much impressed with the district. It was also recently inspected by John A. Kirby, late manager of the Daly-West mine of Ulah and now occupying a similar drift in which the strike was being run in the direction of the territory owned by the Ingot company and the ore was encountered at a point not more than 200 feet from Ingot lines. A study of the formation is said to indicate that the ore runs into the Ingot cate that the ore runs into the Ingot scate that the ore runs into the Ingot scate that the ore runs into the Ingot scate that the ore runs into the Ingot surface showing to that of the Bingham district of Utah, and predicted that its future would be equally great. It is essentially a district that appropriate the strike was a countered at a point not position with the Montana-Tonopah Mining company, who compared its surface showing to that of the Bingham district of Utah, and predicted that its future would be equally great. mine operator, besides offering a singularly attractive inducements to the investor in mining stocks.

EQUIPMENT FOR SLIDE.

Curran-Caswell Mines at Thunder Mt. Ready for Spring Sluicing.

Martin Curran has returned from hunder Mountain, where he had been or some weeks preparing for future merations on the property of the Myserious Slide group, owned by the Curan-Caswell company, says the Boise lightesman. irrious Slide group, owned by the Cirran-Caswell company, says the Boise Statesman.

A mill was taken in; also a sawmill. The latter was put up this fail and a lot of lumber sawed. A building was erected to house the sawmill and other machinery, but the reduction plant will not be installed until next spring. It has been found that a large section of the ground can be slulced to advantage, the values being saved in ordinary sluice boxes. Arrangements have been made for starting such work as early in the spring as there shall be water sufficient. Sixteen hundred feet of pipe is on the ground and the necessary boxes are being prapared. Ben Caswell will have charge of the work, and it is expected he will be able to run until near the first of July.

The last tunnel run was in gravel all the way, never reaching bedrock. It panned well all the way in, the values improving as the work progressed. That ground can all be hydraulicked, and it is expected that, by the time the water ceases running in the spring, the gulch will have been worked from the point where operations will begin up to that tunnel. The bank will there have a height of some 70 feet.

The expectation is that about 75 percent of the values can be saved in the sluices. When piping ceases the mill will be started. It will probably save a larger percentage of the values.

There is room for three giants on the ground and that many may be employed later. The strip of ground upon which they can be employed is some 3,500 feet in length.

Mr. Curran has greater faith than ever in that district. He is satisfied not only that the property of his company con-

length.

Mr. Curran has greater faith than ever that district. He is satisfied not only lat the property of his company contins great values, but is as certain lat a very large nortion of the claims all a very large nortion of the claims ill brove great producers.

The district has not been scratched st, he says. They are only just learning the true nature of the deposits. In the Sunnyside a magnificent body of ore being developed by Captain Treweek. Is going down, not lying flat, and the captain is following it with remark-ply good results. The body is large out the ore is of very good grade. ably good results. The body is large and the ore is of very good grade.

ORE-DRESSING IMPROVED.

New Methods Have Saved the Country From a Zinc Famine.

Discussing improvements in ore con-centration, the Engineering and Mining Journal closes an interesting article as dournat closes an interesting article as follows:

"Attention has been especially directed toward zine ores for two chief reasons, namely, the impurities in zinc ore are especially objectionable, and there has been a shortage in the supply of zinc ore and consequent enhancement of its value, which has made efforts in that field especially attractive.

"If it had not been for these new methods of ore concentration, it is likely that at the present time there would have been a zinc famine; certainly there would not have been in the United States sufficient ore to supply the demand.

would not have been in the United States sufficient ore to supply the demand.

"As yet, the new processes of ore concentration are only in their infancy. Probably few realize the probable extent of the development which they will experience during the next ten years. Or what results may be achieved by them.

hem.

"It is quite certain that no single prosess is a universal panacea for all the
lifficult problems of ore treatment. For
sertain ores, one process is best adapted;
or other ores, another process. For still
other ores, the best results may be
uchieved by a combination of two, or
three, or even more, of the special pro-

is is a direction of effort that has

NAY AUG ORE IS RICH.

Wood River Mine's Product Sells for \$110 a Ton.

The Nay Aug mine of the Wood River Zinc company is opening up splendidly, says the Wood River Times. The exploring drift in the lower tunnel is now in nearly 300 feet, with over a foot of solid galena, besides some concentrating ore in the face. This drift has now been driven over 200 feet in ore that only one barren interval of a few feet. The two raises from the tunnel level are in ore, and stopes are opened both ways from each raise. investors, and these may be briefly summarized as follows:

1. The generally growing demand for fluxing ores by the big smelting ore is extracted weekly. This output can undoubtedly be doubted very soon. The ore sells for \$150 a ton.

Tintic Mining Notes.

(Eureka Reporter.)
John Driscoll has returned to Eureka after two years' absence in Hopewell, N. M., where he was in charge of a mining property. Most of the Eureka mines paid their employees during the week and as a result of the various pay days there has been a marked improvement in all kinds

SECRET SOCIETIES.

A. O. U. W.

Eagle Gate lodge No. 10 had a big meeting last Wednesday evening, at which the members were busy perfecting plans for the fall and winter work. The arrangements for the celebration of the thirty-seventh anniversary of the order are now well under way. The programme as at present decided on is for the two lodges to meet in joint session on the evening of Oct. 28, when a large number of candidates will be on hand for initiation. After the initiatory ceremonies a literary and musical programme will be rendered, interspersed with a number of short speeches by prominent numbers. A large gathering is expected to be present on the occasion, as this will be practically the commencement of a vigorous campaign for new members. The Degree of Honor, at the last session, had a splendid social time after the business of the evening had been completed. The members all took part in a guessing contest and games.

Maccabees.

Utonian tent No. 12, K. O. T. M., held its regular review last Wednesday. Four applications for membership were received and three new members were initiated. Sir Knights should attend the next review.

Fraternal Brotherhood.

The social season for Utah lodge No. 365 of the Fraternai Brotherhood will open next Friday evening, Oct. 20, with a public card party to be given by the members of the lodge. The committee having the matter in hand has completed all arrangements and expects the opening party to be the most successful event in the history of the lodge. The party will be given in the Electrical Workers hall, over the Utah National bank, corner of Main and First South streets.

Knights of Pythias.

Rocky Mountain lodge No. 3 is rapidly Rocky Mountain lodge No. 3 is rapidly increasing its membership, which numbers 183 to date. Last Thursday evening five applications for membership were read and two candidates received the rank of esquire. At its regular convention next Thursday evening the following will be initiated in the rank of knight: Nicholas Schmittroth, A. J. Tail. William J. Ryan, Henry Betz, F. M. McCarthy and T. R. Woodard. All members of the order are cordially invited to attend.

The Royal Neighbors of Salt Lake Valthe koyal Neighbors of Sait Lake Val-dey camp met in regular session, after the camp fire had been duly lighted and duly opened in regular form. A candi-date was mittated with the Royal Neigh-bors' ritual, the marshal guiding the no-vitate to the several altars, where each person read to her the solemn and im-pressive lessons given, with charges to ever protest her the solem and imperson read to her the solemn and impressive lessons given, with charges to ever protect, by her fidelity, the secrets of this worthy order. Several of the members made short speeches, followed by an organ solo by Mrs. Smith.

Ladies of the Maccabees.

There will be regular review of Salt Lake City hive No. 4 on Monday even-ing, Oct. 16, and all members are re-quested to attend for the good of the order. Lillian M. Hollister hive, No. 15, will hold the regular review tonight at Odd Fellows' hall.

Woman's Relief Corps.

George R. Maxwell W. R. C. will hold its regular meeting at 2:30 Wednesday afternoon in I. O. O. F. temple. Visiting sisters welcome.

The members and friends of the James B. McKean W. R. C. will be entertained next Thursday afternoon at the home of Mrs. L. Duncan, 1013 Blaine avenue, Perkins addition. Mrs. Duncan will be assisted by Mrs. Dewey and Mrs. Smith.

Fraternal Union of America.

Evergreen lodge No. 151 met last Monday evening. The usual business was transacted and the subject of the special dispensation was taken up. There remain but a few more days in which new applications will be accepted under the special dispensation for the month. Persons desiring to become social members will be charged a special rate under the same dispensation. Next Monday evening will be the regular meeting, and the last one this month. The premium offered by the secretary to the frater obtaining the greatest number of successful applicants this month will be on exhibition at the lodge room on Monday evening next. This premium is offered for three or more applications as above stated. Frater H. B. Rugg is still confined in St. Mark's hospital with typhoid fever. Mrs. Jennie King, recently operated on for appendicitis at the same institution, left for Portland last week.

Miners, Save Your Rubber.

The rapid growth of reclaiming rubber from old articles of that material is shown not only in the number of patents snown not only in the number of patents that are issued covering new methods, but is also reflected in the new companies formed and in the additional plants erected. This due to the high price of crude rubber, Around the mines old rubber packing and valve seats should be saved as carefully as is scrap from. There is great demand for this old material.

been a marked improvement in all kinds of business. The big pump at the Cherry Creek pumping plant of the Mammoth Mining company's sampler at the northern base of the mountain provides a local market for the ore.

The nature of the ore being such that no charge is made for treatment of ore showing a high percentage of lead, enabling the shipment of \$25\$ and 30 ore of this description to be made at a profit.

Some of the Producers.

Of course, there yet remains a vast amount of work to be done to demonstrate that the district can supply sufficient fluxing ore to justify the erection of a local smaller. But there are now indications that this will be proved. In addition to the Nevada-Alpine mine the following companies are now indications that this will be proved. In addition to the Nevada-Alpine mine the following companies are actively developing of pollogies of the signal, which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal, which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of the signal which is hardly like—Anaconda Tonopali Mining comparies are actively developing of pollogies of shipping grade:

Assessment No. 2.

BUTLER-LIBERAL CONSOLIDATED Mining company, a corporation. Principal place of business. Salt Lake City, Utah.—Notice is hereby given that at a meeting of the board of directors of the Butler-Liberal Consolidated Mining company, held at Salt Lake City, Utah, on the 15th day of September, 1966, an assessment of three (3) cents per share was levied upon the capital stock of the corporation, issued and outstanding, payable immediately to W. P. Lynn, secretary of the company, at his office, 304 Progress building, Salt Lake City, Utah.

Any stock upon which this assessment may remain unpaid on the 20th day of October, 1965 will be delinquent and advertised for sale at public auction, and, unless payment is made before, will be sold on the 19th day of November, 1966, at 2 p. m., to pay the delinquent assessment thereon, together with the cost of advertising and expense of sale.

W. P. LYNN, Secretary, First publication, September 16th, 1965.

NOT SATISFIED.

4. Authorizing the directors to make by-laws and alter and amend them at
